

This app does not collect or transmit user data without permission. The only time data is collected is if a user wishes to submit a new traditional place name listing to Bristol Bay Native Corporation's lands office. If so the user is asked to submit his/her contact information so the BBNC staff can contact him/her for more information. Additionally, the user has the option of using his/her phone's GPS to record the position of the place name for submission to BBNC.
